Strep A and Scarlet Fever

There are currently high rates of Group A strep and scarlet fever in the UK. Scarlet fever, which is caused by the bacteria Group A streptococcus, is usually a mild illness but it is highly infectious.

The rash of scarlet fever often begins with small spots on the body that then spread to the neck, arms and legs over the next 1-2 days. It is often 'sand-paper' like to touch but is not itchy.

Your child may also have a:

- Sore throat/tonsillitis
- Fever (temperature of 38°C (100.4°F) or above)
- Painful, swollen glands in the neck
- A red tongue (strawberry tongue)
